

Data Science and Analytics professional with 2 years of experience applying Python, SQL, Tableau, and statistical modelling to solve complex business problems through predictive analytics and machine learning. Experienced in exploratory data analysis, customer segmentation, KPI optimisation, automated reporting, and developing LLM-powered applications using Google Gemini Pro, LangChain, and Streamlit. Passionate about leveraging AI, GenAI, and advanced analytics to improve customer targeting, business strategy, and commercial growth.

## SKILLS

Python (Pandas, NumPy, Scikit-learn) • SQL (Advanced Queries, Joins, CTEs, Window Functions) • Jupyter Notebook • Data Extraction, Cleaning & Transformation • ETL & Data Processing • Tableau • Power BI • Matplotlib • Seaborn • Dashboard Development • Hypothesis Testing • Regression Analysis • A/B Testing • Forecasting • Quantitative Analysis • Strategic Thinking • Communication & Presentation Skills

## TECHNICAL EXPERIENCE

### Analyst

Sept 2024 — June 2026

KPMG

Bengaluru, Karnataka

- Built and maintained 5 dashboards across Tableau and Power BI for banking-sector and mobile-tower-operator engagements, consolidating analytical outputs into recurring views for client stakeholders.
- Wrote and optimised SQL queries to extract and transform 400K+ row datasets from source systems supporting dashboard development and business reporting.
- Analysed operational and business datasets using Python, SQL and statistical techniques to identify KPI trends, reporting inconsistencies and opportunities for process and cost optimisation.
- Translated stakeholder requirements into scalable analytical and reporting solutions. Automated recurring reporting workflows and dashboard pipelines, improving reporting efficiency and reducing manual analytical effort.
- Communicated analytical findings through dashboards and business presentations, converting complex data into actionable insights for stakeholders. Supported data quality, validation and reporting processes across enterprise client engagements.

### Academic Intern

April 2024 — Sept 2024

KPMG

Bengaluru, Karnataka

- Supported dashboard development, maintenance and ad hoc analytical reporting using Tableau, Power BI and SQL.
- Prepared and validated datasets for telecom reporting, performing data QA and resolving reporting inconsistencies.

## PROJECTS

### Customer Churn Prediction using Artificial Neural Network

[Link to Demo](#)

- Analysed **10K+** bank customer records; **11** behavioural data attributes were cleaned and preprocessed for retention forecasting. Built and optimised an Artificial Neural Network (ANN) using Keras and TensorFlow and deployed the predictive pipeline via a Streamlit web app.

### Merchant Sales Analytics Dashboard

[Link to Demo](#)

- Built a dashboard against **8** defined business requirements — top/bottom product performance, time-trend analysis, period comparisons, discount analysis, city-level sales. Built a dimensional model (**1 fact + 3 dimension tables**) with calculated columns, then interactive visuals (**map, bar, scatter, line, column**) with measure- and cross-visual filtering.

### Network Security System

[Link to Demo](#)

- Built an end-to-end Network Security ML pipeline using Python, MongoDB, scikit-learn, Docker and AWS; implemented data ingestion, schema/data-drift validation, preprocessing with imputation, RobustScaler and SMOTETomek, automated model training/evaluation and artefact tracking, then containerised and deployed the prediction service on AWS with GitHub Actions CI/CD.

### YouTube Creator Growth & Ecosystem Analytics

[Link to Demo](#)

- Analyzed **995** top YouTube channels (**28 attributes, Global YouTube Statistics dataset**); cleaned to **554 records/23 features**. Built and benchmarked **5 models** (**Linear/Ridge/Lasso/Elastic Net regression, Decision Tree, Random Forest**) and applied NLP (**NLTK, TextBlob**) predicting subscriber count from engagement data.

## EDUCATION

Bachelor of Technology in Artificial Intelligence & Machine Learning

SRMIST University, November 2024

## CERTIFICATIONS

Google Advanced Data Analytics • IBM Data Science • GenAI apps using Gemini Pro • Stanford Supervised ML • Meta Version Control

## ACHIEVEMENTS

Awarded Two SPOT awards at KPMG India • Third at Ubisoft India FindTheLag Contest (IIT Bombay) • NCC Airwing Cadet Captain
